

Robert Cunningham
V.C. for Research Infrastructure

Dr. Cunningham is responsible for the strategic leadership of the University's research infrastructure and directs special initiatives.

Cunningham has broad experience across STEM, cyber science, physical science and neuroscience, as well as leading enterprise-scale teams of faculty and staff. His research has explored machine learning, digital image processing, computer intrusion detection, systems security and privacy, and software engineering. Cunningham has patented, presented and published widely, and chaired the IEEE Cybersecurity Initiative.
